PROFILE

Python backend developer with 4+ years of apprenticeship experience in software development, REST APIs, data processing, and migrations. Experienced with Python, Flask, FastAPI, SQL, PostgreSQL, AWS, Docker, and CI/CD. Develops and deploys backend, ETL, and AI/RAG solutions in cloud and on-premises environments.

EXPERIENCE

Python Software Developer — Backend, Data & AI — Apprenticeship Studio Beyowi

October 2023 — Present
Paris 13th arrondissement, France

Developing and maintaining data migration and AI integration solutions, from APIs through deployment on AWS and on-premises environments.

- **Contributed to 3 major migration projects involving several GB of data** — including ANSM reference data, the Thesorimed repository ETL, and API/AI workflows for the Primotheus real-estate platform.
- **Designed APIs and data-processing workflows with Python, Flask, and AWS Lambda** — from development through deployment and maintenance on AWS and on-premises environments.
- **Developed and maintained data migration and synchronization pipelines** — across Oracle, MySQL, PostgreSQL, SQL Server, and SQLite with AWS DMS.
- **Implemented RAG and vector-search approaches** — with PGVector, Qdrant, and OpenAI services for data, image, and document analysis.
- **Deployed and maintained multi-service environments** — with AWS and Docker, using CI/CD pipelines to automate tests and deployments.

Python · Flask · FastAPI · AWS Lambda/DMS · SQL · PostgreSQL · MySQL · Oracle · SQL Server (MSSQL) · SQLite · PGVector · Qdrant · Docker · CI/CD

Backend Developer (apprentice) Intento Design

September 2022 — August 2023
Paris, France

C++ development for ID-Xplore, a CAD application for analog integrated-circuit design.

- **Improved features** — with a focus on performance and reliability.
- **Contributed to circuit-generation and validation algorithms** — as well as multi-technology compatibility.
- Contributed to unit tests and technical documentation.

C++ · Algorithms · Unit testing

SKILLS

Backend & APIs	Python, SQL, REST, REST APIs, Flask, FastAPI, pytest, Git
Data & AI	ETL, Pandas, NumPy, LLM, RAG, OpenAI API, vector search, PGVector, Qdrant
Databases	PostgreSQL, MySQL, Oracle, SQL Server, MSSQL, SQLite
Cloud & DevOps	AWS (Lambda, DMS, EC2, S3, RDS, CloudWatch), Docker, CI/CD, GitHub Actions
Additional knowledge	C++, Java, JavaScript/TypeScript, Linux

EDUCATION

Master's Degree in Computer Science — Artificial Intelligence Engineering — completed in 2026 University Paris 8 Vincennes — Saint-Denis

2024 — 2026

PROJECTS

PERSONAL PROJECTS

Palimia

Developing a full-stack app to track, rate, and organize movies, TV series, and video games — Next.js, TypeScript, PostgreSQL, Prisma, Better Auth.

Ludosaic

Modular web mini-game platform under active development, with solo, bot, and multiplayer modes depending on the game — Next.js, TypeScript, React, PostgreSQL, Colyseus.
