Software developer working primarily on web applications. I enjoy starting from a concrete need, understanding the relevant system, and building a clear, maintainable, and pleasant-to-use solution.

EXPERIENCE

Web Developer (apprentice)

Studio Beyowi

October 2023 – September 2026
Paris 13th arrondissement, France

Development and evolution of web applications, with independent ownership of complex data migration and AI integration projects, from design through production delivery.

- Designed, developed, and maintained features addressing user and business needs.
- Designed Python APIs with Flask and AWS Lambda, built interfaces, and automated processes.
- Migrated and synchronized data across Oracle, MySQL, PostgreSQL, MSSQL, and SQLite databases.
- Designed RAG approaches and vector search with PGVector and Qdrant.
- Contributed to technical choices, bug fixes, and checks before production delivery.

Python, Flask, Svelte, AWS Lambda, Docker, Git, PL/SQL, Oracle, MySQL, PostgreSQL, MSSQL, SQLite, PGVector, Qdrant

Backend Developer (apprentice)

Intento Design

September 2022 – August 2023
Paris, France

Contributed to the backend development of the company's main application.

- Developed features from needs defined with the apprenticeship supervisor.
- Maintained existing code, resolved bugs, and contributed to technical evolution.
- First experience with a team project and its professional expectations.

C++

Building Maintenance Agent

Sealed Air Corporation

July 2022 – August 2022
Épernon, France

Summer assignment in the building services department.

- Contributed to infrastructure maintenance and upkeep work.
- Built rigor, teamwork, and organizational skills in an industrial environment.

EDUCATION

Master's Degree in Computer Science — Artificial Intelligence Engineering
University Paris 8 Vincennes — Saint-Denis

2024 – 2026
Saint-Denis and Aubervilliers, France

Advanced study of AI, machine learning, deep learning, data processing, and software engineering.

Bachelor of Technology (BUT) in Computer Science
Paris Rives de Seine IUT — Université Paris Cité

2021 – 2024
Paris 16th arrondissement, France

Application Development pathway: design, development, and validation. Foundations in algorithms, software, databases, architecture, and project management.

French General Baccalaureate, honors
Lycée Jehan de Beauce

2018 – 2021
Chartres, France

Specializations in Computer Science and Mathematics; physical education and advanced mathematics options.

SKILLS

Web frontend and interfaces

Backend, APIs, and databases

Software architecture and systems analysis

Testing, accessibility, and performance

UX / UI

AWS cloud, Docker, and automation

Applied artificial intelligence, RAG, and vector search

Applied cybersecurity, currently learning

Professional English

PROJECTS AND HACKATHONS

Palimia

Solo personal project bringing movie, TV series, video game, anime, and manga tracking into one cultural profile.

Ludosaic

Solo personal project for a modular web platform bringing together several mini-games and play modes.

Hackathons and group projects

A 3-day history and geography revision app; a sea-rescue database for Nuit de l'Info 2021; an HIV-awareness app for the 2022 edition; and a 10-day AI hackathon in a team of three for companies partnered with the master's program.
