Profile

Backend developer with a master's in AI engineering (2026). Apprenticeships since 2022: Python APIs, SQL, AWS, RAG and C++. Personal TypeScript projects; open to different backend languages and environments.

Work experience

Python Software Developer — Apprenticeship October 2023 — September 2026
Studio Beyowi Paris 13th arrondissement, France

- **Backend APIs** — Designed REST APIs and data-processing workflows: Python, Flask, AWS Lambda.
- **Applied AI** — Integrated RAG and vector search: PGVector, Qdrant, OpenAI services.
- **SQL data** — Developed and maintained migration and synchronization pipelines with AWS DMS.
- **Contributions** — Contributed to 3 projects in digital health and wealth management: reference data, ETL, APIs and AI workflows, working with several GB of data.
- **Cloud & testing** — Deployed and maintained services on AWS and on premises: Docker, automated tests and deployments through CI/CD.

C++ Backend Developer — Apprenticeship September 2022 — August 2023
Intento Design Paris 1st arrondissement, France

- Developed C++ features; contributed to circuit-generation and validation algorithms for the ID-Xplore CAD application.
- Contributed to unit tests, compatibility across circuit technologies, and technical documentation.
