Curious and versatile software developer with more than three years of experience in software development. My work includes Python, data migration, and automation. I design APIs and data flows, then deploy and maintain them across AWS and on-premises environments, with consistent attention to reliability and testing.

EXPERIENCE

Web Developer (apprentice)
Studio Beyowi

October 2023 – Present
Paris 13th arrondissement, France

Designed and maintained data migration and AI integration solutions, from APIs through AWS and on-premises deployment.

- Designed APIs and data-processing workflows with Python, Flask, and AWS Lambda.
- Migrated and synchronized data across Oracle, MySQL, PostgreSQL, MSSQL, and SQLite databases with AWS DMS.
- Built RAG and vector-search approaches with PGVector and Qdrant; integrated OpenAI services for data, image, and document analysis.
- Contributed to three major multi-gigabyte migration programs: ANSM reference data, the Thesorimed repository ETL, and APIs/AI workflows for the Primotheus real-estate platform.
- Deployed, tested, monitored, and maintained multi-service environments with AWS, Docker, and CI/CD pipelines.

Python · Flask · AWS Lambda · AWS DMS · PostgreSQL · MySQL · Oracle · MSSQL · SQLite · PGVector · Qdrant · Docker

Backend Developer (apprentice)
Intento Design

September 2022 – August 2023
Paris, France

C++ development for ID-Xplore, a CAD application for analog integrated-circuit design.

- Developed and improved features with a focus on performance and reliability.
- Contributed to circuit generation and validation algorithms and multi-technology compatibility.
- Contributed to unit tests and technical documentation.

C++ · Algorithms · Unit testing

Building Maintenance Agent
Sealed Air Corporation

July 2022 – August 2022
Épernon, France

Worked as part of a team renovating a building during a two-month summer assignment.

EDUCATION

Master's Degree in Computer Science — Artificial Intelligence Engineering
University Paris 8 Vincennes — Saint-Denis

2024 – 2026

Bachelor of Technology (BUT) in Computer Science
Paris Rives de Seine IUT — Université Paris Cité

2021 – 2024

French General Baccalaureate, honors
Lycée Jehan de Beauce

2018 – 2021

Specializations in Digital and Computer Science and mathematics; additional options in physical education and advanced mathematics.

SKILLS

Backend & data	Python, Flask, FastAPI, REST APIs, ETL, Pandas, NumPy, C++
Applied AI	OpenAI API, RAG, semantic search, PGVector, Qdrant
Cloud & DevOps	AWS (EC2, S3, RDS, DMS, Lambda, CloudWatch), Docker, CI/CD
Databases	PostgreSQL, MySQL, Oracle, MSSQL, SQLite, migration and synchronization
Quality & delivery	pytest, integration testing, coverage, Git, Black, Ruff, Scrum, Jira
Education & projects	C, Java, VB.NET, Kotlin, HTML, CSS, JavaScript, PHP, Next.js, Windows, Linux, Android

LANGUAGES

French	Native
English	Professional working proficiency

PROJECTS AND HACKATHONS

PERSONAL PROJECTS

Palimia	Personal project bringing movie, TV series, and video game tracking into a personal cultural library.
Ludosaic	Personal project for a modular web platform bringing together several mini-games and play modes.

HACKATHONS

AI hackathon	Ten-day project in a team of three for companies partnered with the master's program.
Nuit de l'Info 2022	Built an HIV-awareness application during an overnight challenge.
Nuit de l'Info 2021	Built a search system cataloging sea rescues during an overnight challenge.
High-school hackathon	Built a quiz application in three days to help students revise history and geography.
